

Shreyan Parajuli

Frontend Developer & UI/UX Designer

Kathmandu, Nepal | shreyanparajuli@sysnefo.com | <https://www.linkedin.com/in/srynprjl> | <https://github.com/srynprjl>

SUMMARY

Frontend developer and UI/UX designer who loves turning ideas into interfaces that feel effortless. I spend most of my time in React and modern web tooling, obsessing over layout, typography, and the small interactions that make software feel alive. I also enjoy backend development with Python, Django, Node, and Go, which helps me shape APIs my interfaces deserve. Lately I have been dabbling in Android apps too, exploring how the same design instincts translate to small screens and touch first experiences.

SKILLS

Languages: Python, JavaScript, Go, SQL, HTML/CSS

Frameworks & Tools: React.js, Next.js, Node.js, Express.js, Docker, Git, Django

Applications: Figma, Penpot, Canva, Google Workspace

Practices: Agile Methodologies, Object Oriented Programming, RESTful APIs

EDUCATION

Apex College, Pokhara University

Bachelor of Computer Systems and Information Technology, Kathmandu, Nepal

Expected: Dec 2027

Budhanilkantha School

Cambridge International Advanced Levels, Kathmandu, Nepal

Completed: June 2023

PROJECTS

Kazumi (May 2026)

CLI application built with Golang for YouTube audio manipulation.

Built with: Golang, Cobra, FFmpeg

GitHub: <https://github.com/srynprjl/kazumi>

Sikhai (July 2025)

Responsive web interface connecting a React.js frontend with a Django backend.

Built with: React.js, TailwindCSS, JavaScript, Django, Python

GitHub: <https://github.com/srynprjl/sikhai>

Spam Detection System (July 2025)

Spam Detection System

Built with: Python, Pandas, Numpy, Matplotlib, Dash, Jupyter

GitHub: <https://github.com/srynprjl/spam-detection>

Movie Recommendation System (July 2025)

Movie Recommendation System

Built with: Python, Pandas, Numpy, Matplotlib, Scikit Learn, Jupyter, Streamlit

GitHub: <https://github.com/srynprjl/movie-recommendation-system>
